# WELCOME TO FORT GARRY FIRE TRUCKS

Fort Garry Fire Trucks Ltd. is the largest fire apparatus manufacturer in Canada, with its manufacturing headquarters in Winnipeg, Manitoba, Canada.

From its beginnings in 1919, Fort Garry Fire Trucks Ltd. has become the premier Canadian manufacturer of custom made fire and emergency service vehicles with apparatus sales around the world. Our Rubber Division has been an active part of the company all throughout the years, progressing to become a full service rubber manufacturing facility serving North America.

Our professional dedicated sales team is continually educated on the new innovations available and are ready to work with you from start to finish to ensure that the vehicle you receive is exactly what you need.

Fort Garry Fire Trucks became the first North American emergency vehicle manufacturer to implement the International Standards Organization in their manufacturing process. First with an ISO 9000 rating in 1994 then upgrading to ISO 9001 in 2008. Stringent quality control is a part of every build and it shows in customer satisfaction and our apparatus long term service lives. We are so confident of our experience in engineering quality built apparatus designed for the most extreme climate and conditions, that we offer one of the best warranties in the industry; 20 years on some models. We are the only large scale manufacturer that will offer steel, aluminum, and stainless steel bodies.

**“At our Department we have a motto which is “Dedicated to Service Excellence”, I feel as though your staff have taken this to be their own. You should be very proud of your staff and their commitment in satisfying your customers.”**

— (In memory of) Mike Saunders, Fire Chief, City of North Battleford, Fire and Emergency Services

## MANUFACTURING FACILITY

Our commitment to the fire service is shown with our new state of the art manufacturing facility that was completed in January of 2013.

Our promise of customer service excellence will continue long after you have taken possession of your new apparatus. As a part of our ISO 9001 rating, we keep a comprehensive record of every manufacturing step, from each weld to the exact paint colour. If you ever have to use our warranty or after sales services you can be assured that we will know exactly what component was used on your truck which allows you to keep your vehicles serviced long into the future. All warranty claims are processed within 24 hours to ensure your truck is back in service for the next call.

We would be pleased to present the latest in fire apparatus technology with a plant tour and a customized presentation to show what sets us apart from other builders. Contact the Fort Garry Fire Trucks sales office at our toll free number 1-800-565-3473 to set up a tour.

## PRIOR TO PURCHASING A FIRE APPARATUS

Purchasing a fire truck or other type of emergency vehicle requires a great deal of research and thought. At Fort Garry, we help you through that process by identifying key areas that must be considered.

### History and Financial Stability

Will the company you choose be there when you need them?

### National Safety Mark

Is your manufacturer registered and do they follow the strict regulations issued by the Department of Transport?

### Liability Insurance

Does the manufacturer carry liability insurance for the recommended amount of \$25 million?

### Dealer License

Are you purchasing from a manufacturer that is licensed to sell motor vehicles? This is mandatory in most jurisdictions.

### Association Membership

Does your manufacturer belong to the Fire Apparatus Manufacturer Association (FAMA), which identifies reputable builders?

### Certified Engineers

Does your manufacturer have certified engineers on staff? Only engineers can ensure that every component of your vehicle is properly designed.

### Quality Program and Ongoing Support

Does your manufacturer have a certified ISO quality program and manuals that meet or exceed ULC or NFPA standards?

# Portable Water Tanks

- Easy Lift Handles mounted to the floor of the tank (US Patent No. 8,746,478 and other patents pending)
- Quick Dump (US Patent No. 8,733,579)
- Lifetime warranty on welds & welded seams
- Registered, exclusive Exlon® material
- Pinch-free design
- Superior heavy duty
- Laser-cut hinge design

FOLDING FRAME TANKS • SELF-SUPPORTING TANKS • SALVAGE COVERS

**“As the WFPS FAC project manager, I consider myself tremendously privileged to have worked alongside the talented and knowledgeable staff representing FGFT.”**

— Don Enns, Assistant Chief, MBA, PBDM, Project Manager, Winnipeg Fire Paramedic Service — Fire Apparatus Committee

# EXPERT ENGINEERING AND CONSTRUCTION

The utilization of 3D modeling software allows our team of engineers to design your new apparatus to your specifications. Working with your requirements, our engineers use their skill and experience to develop the best solution to each customer's needs.

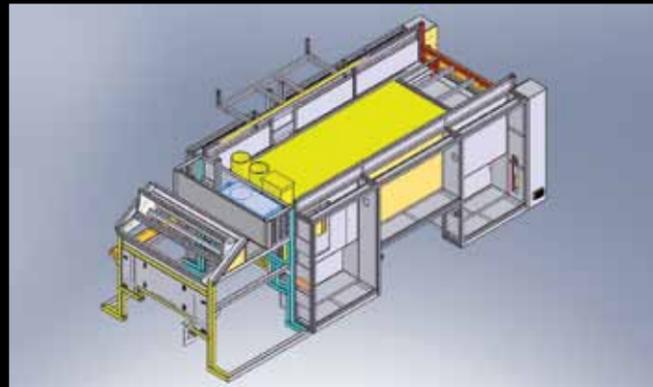

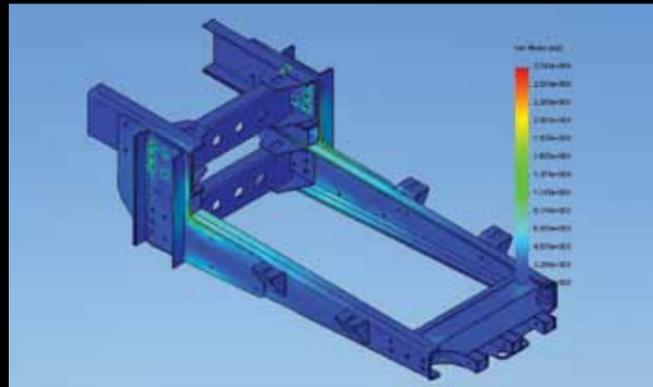

A testimony to our innovation and commitment to servicing our customers, Fort Garry Fire Trucks designed and manufactured the first enclosed top mount pumper built in North America. This design was tested to the ECE-R29 roof crush test.

When it comes to constructing your vehicle, only the highest quality materials are used to ensure durability, strength, and corrosion resistance. We then go further by adding details that none of our competitors can match.

- Welded backing plates for all access step mounts
- Structural floor reinforcement under lower compartments
- Spring loaded body mounting
- UHMW / Polyethylene gaskets for isolating all body mounted components with dissimilar metals to reduce or eliminate galvanic reactions

And because we are designing your truck with all aspects of service requirements we also take the extra steps to ensure its serviceability.

- Swing out gauge panel for servicing gauges and electrical components
- Removable wheel well skirts allow access to chassis springs and suspension components
- Removable tailboards and running boards are easy to replace if damaged

# IT'S A GAME CHANGER.

**Solaris LED Rotating Reflector**  
The only LED reflector with true 360° of light output.

**QuadraFlare LED Reflectors**  
No dark spots. Powerful light performance.

As you work towards that ultimate game plan, add **Navigator™** to your starting line-up. This linear, high-profile LED lightbar offers first responders a winning play using LED reflectors and LED rotators inside one lightbar platform. This combination adds up to improved visibility on the road and at the scene.

Federal Signal's patented Solaris LED Rotating Reflector technology and QuadraFlare LED Reflectors are available in two-color options.

Visit [fedsig.com](http://fedsig.com) to see how Navigator is a game changer.

# DETAILS DISTINGUISHING FGFT

## Compartments

All compartments receive reinforcement because you cannot plan in advance what component will be stored in each compartment so it's best to have the highest strength floor possible in every compartment. All our pan door designs are of the flush fit design and we use cover plates on inside door opening hardware to prevent stored gear from fouling up the door mechanisms.

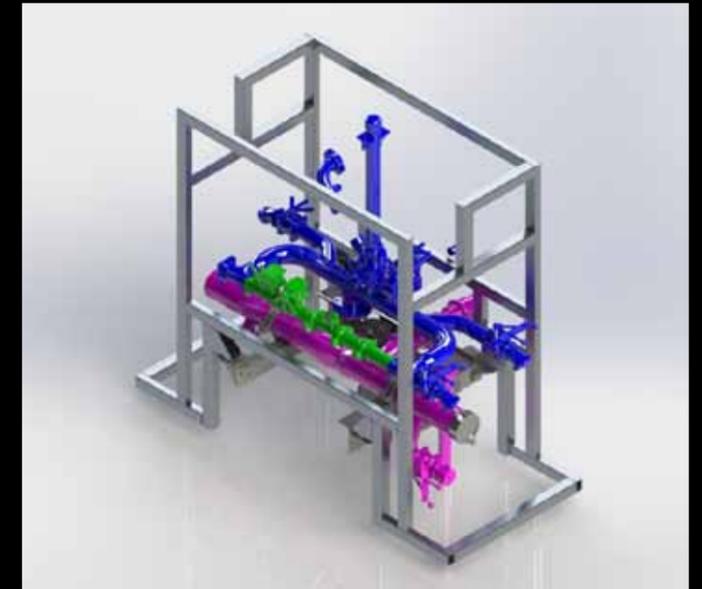

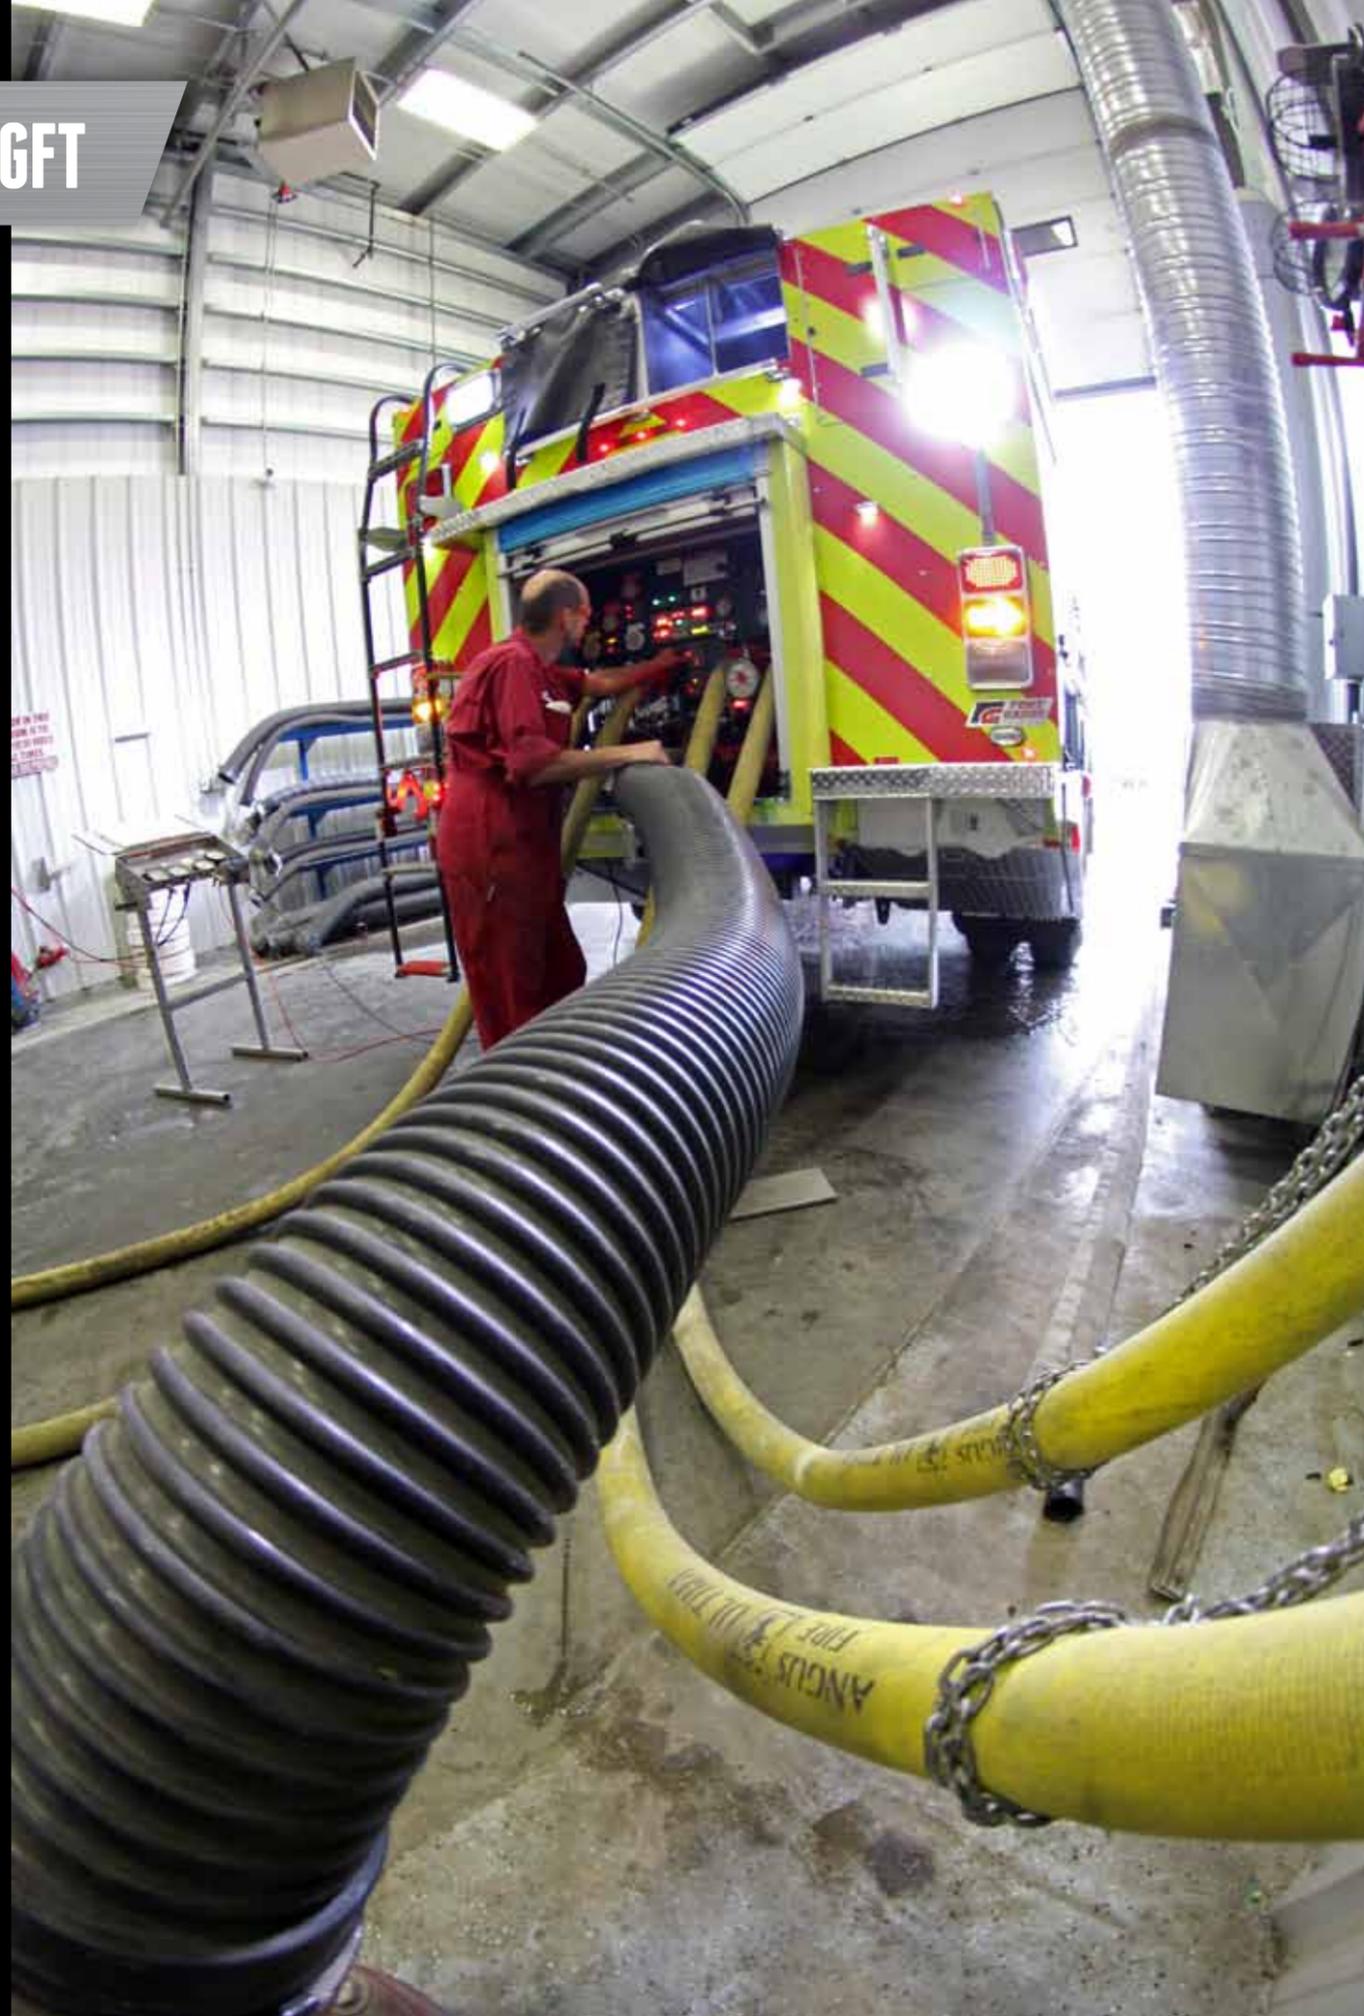

## Corrosion Protection and Painting

Our vehicles are operating in some of the harshest climates in the world under extreme conditions. Corrosion protection and paint are the bodies' protection from the elements. Fort Garry's state of the art downdraft paint booth allows a fully cured automotive grade finish by baking the paint finish at 150°F for 1 hour. A standard Non Prorated 10 year paint warranty is testimony to the success of our painting procedure.

## Electrical Systems

The highest degree of wiring system safety and functionality is built into every vehicle. Wiring features include:

- GXL insulation around wires.
- Colour and function coded wiring.
- Terminals and crimp connections protected by heat shrink seals. NO SOLDERING.
- Easy to follow wiring diagrams with every delivery.

## Pumps, Plumbing, Operator Panel

Waterous, Darley, and Hale pumps are available depending on customer needs. Our custom precision cut stainless steel or aluminum operator panels are designed for maximum heat retention within the pumphouse. Rubber Grommets around side discharges and swing handle actuators maximize this heat retention. Plumbing is available in Schedule 10 stainless steel or Schedule 40 galvanized steel.

## Testing and Certification

Fort Garry Fire Trucks is certified by Underwriters Laboratories of Canada (ULC) for the manufacturing of emergency vehicle apparatus. We also have a third party testing organization to ensure your new apparatus meets the requirements of ULC and NFPA. All testing is performed on site in our modern test bay.

# OUR CERTIFICATIONS – FGFT AROUND THE WORLD

Our quality is enhanced and assured by the associations we belong to along with the certifications our vehicles carry.

## Fort Garry Fire Trucks Around the World

Customers at home and around the globe recognize and value our vehicles for their rugged construction and durability under extreme conditions.

- North America • Guatemala
- West Africa • Bahamas
- United Arab Emirates • China
- Pakistan • Cuba

“Once again I personally want to thank you and Fort Garry for the overall great experience with the purchase of our latest pumper. While this is our third pumper purchase from Fort Garry, this was my first. I need to give you personally the credit for making it such a great experience as you were and I consider, my primary Fort Garry Interface. Your demeanor and ready laugh made it even a much more pleasant experience than one can expect. You are a wealth of knowledge when it comes to your equipment.”

— Matt Spirko, Assistant Chief, Tri Community Volunteer Fire Department, North Carolina

# **G** **RUBBER** FT **DIVISION**

The Rubber Division has been a constant part of the company since it was founded in 1919 and continues to play an important role in its future.

Customers choose us for their elastomer needs because of our willingness and ability to work with them to develop their products, present alternative ideas, all the while having the processes and materials available for a wide variety of concepts and ideas.

Some of those products include custom extrusions, custom compression molded parts, roller recovering and regrinding, protective lining applications, wheel and pulley coverings, urethane cast parts and wheels, and in house machine shop for fabrication.

Our full service abilities allow us to supply every type of industry operating today, from aerospace and trucking, to mining and food processing, to agriculture and packaging, we continue to meet our customers' ever changing demands. This commitment ensures our success and growth going forward into the future.

**Spartan Chassis is a market-leading manufacturer of custom cab/chassis that has been satisfying customers and fire fighters since 1975. A Spartan is purpose-built from the ground up—designed and built by firefighters for firefighters.**

***SAFETY***

Making it the #1 safety system in the fire industry, the Spartan Chassis Advanced Protection System® includes full-size, side curtain airbags which are 300% to 700% larger than competitive airbags.

***CUSTOMIZATION***

No other cab/chassis OEM offers more customization. Examples: our top-of-the-line Gladiator offers over 18,000 engineered options. The Metro Star offers over 17,500 options.

***THE MOST SPACIOUS***

The Spartan cab offers industry leading ergonomics and the most room available and in the places that count. This enables improved visibility, in-cab communications, storage and comfort.

***THE BEST ENTRY & EGRESS***

Industry's largest cab steps, lowest step height and tallest, widest cab doors allow for safe and efficient entry/egress.

***INDUSTRY-LEADING MANEUVERABILITY***

Our vehicles provide the tightest turning radius and cramp angles allowing the Spartan Chassis customer more access and improved safety.

***HIGHEST QUALITY***

It all begins at the plant. Spartan manufacturing plants stand apart from the industry. Combine this with world-class quality systems and exceptional engineering, you have the best quality cab/chassis available.

**Congratulations to Fort Garry for 95 Years of Dedicated Service.**

Experience and Focus are what set Sutphen apart from the competition. Over 124 years of experience go into each apparatus that we build, and our Company focus is to build the safest and most effective product available. In those 124 years, technology has evolved and improvements have been made, but the Sutphen philosophy remains unchanged. Quality, craftsmanship, and family values have been our passion for over a century. It is what we do, and nobody can do it better.

Come, see, believe... Experience Sutphen.
